

COMPUTER STUFF- **Connecting your computer to your TV-**

STEP 1- FIND YOUR CORRECT CORDS

The first thing you need to do is figure what cord you require. All you require is the correct video adapter and cord. Please see the doc below for more info about what cords you will need. If this is not e.g. for you, don't freak out! Find a local 'big box' entertainment store or techie friend, take your laptop/Mac down to them with the make and model of your TV, and tell them to get you hooked up.

The first link below is for the Mac video adapter, and the second one is for the most common cable for Macs and PCs. PCs will not need an adapter, just the cable.

<http://www.bestbuy.com/site/Apple%26%23174%3B+-+Apple+Mini+Display+Port+to+DVI+Adapter/9208519.p?id=1218059403252&skuld=9208519&st=displayport&cp=1&lp=2>
<http://www.bestbuy.com/site/Dynex%26%23153%3B+-+6'+DVI-to-HDMI+Digital+Video+Cable/8426223.p?id=1181832625335&skuld=8426223&st=dynex&cp=1&lp=9>

For those of you who have a large room and need louder sound you'll need to purchase a 1/8th inch stereo to RCA cable. This will plug into a typical home stereo system, and then in to your audio out, out of your laptop to amplify the sound. Test this ahead of time.

You can acquire this cable at RadioShack, Wal-Mart, or Target in the US.

<http://www.radioshack.com/product/index.jsp?productId=3240426>

STEP 2- HOOK THEM UP

Once you have acquired your cables, watch these 2 YouTube videos on how to get setup!

Here are your how to videos:

Part1: <http://www.youtube.com/watch?v=ecJtUZmMHzw>

Part2: <http://www.youtube.com/watch?v=TK2JmFreOdY>

STEP 3- TEST When you've completed your computer setup, go to this link <http://www.tikilive.com/video/28154> and test your connection. This will start a test video for you in your web browser.

The day of the event it will work JUST like this only you will have a username and password in order to view. You will be sent this username and password at least 24 hours before the event if not sooner.

Internet Speed- For the stream to play smoothly you will want a minimum internet speed of 500k/sec. If your internet service says it supports this and your video still stops and start, see connectivity notes below.

IMPORTANT NOTES on connectivity-

- Any 1.5 megabit (1500 kps) internet service will support this stream.
- Make sure you turn off or unplug all internet devices such as printers, laptops, desktop computers, or anything your not going to be using during the broadcast. This includes any wireless devices, including any of your neighbors who may be sharing your connection.
- It is preferable that the computer your using for the stream itself should be plugged in with an internet cable instead of wireless.

2nd computer- The first laptop will be for you to connect to your big screen or monitor. Once your logged into our video site, there will be an on screen button in the bottom right hand corner to make the streaming picture full screen. Leave that computer alone for the entirety of the streaming.

The 2nd computer will be to send in questions via Skype. Before the streaming event go to www.skype.com <<http://www.skype.com>> <<http://www.skype.com>>, and setup your free Skype account if you don't already have one. The chat interface is what we will use in Skype; so don't worry if your microphone and speakers are setup for the event. Please add access.consciousness to your contact list. This is the account we will be receiving questions from. You may also email in questions to blossom@accessconsciousness.com if you are in delayed time or if you do not choose to use Skype.

For logistical or registration related questions, to make changes to your web posting, please contact Blossom@accessconsciousness.com or +1 949.533.7179.

For technical related questions, help troubleshooting, or to find out more about if your internet connection will be suitable, please email Suzy Godsey suzy@accessconsciousness.com

I cannot thank you enough for your willingness and eagerness to be a part of this new possibility. We will do EVERYTHING in our means to make this fun and rewarding and as efg as possible. Please contact us if you have any questions or requirements.

What else is possible in the spreading and accessibility of consciousness on the planet?

With thanks,
Blossom Benedict
Project Coordinator
